Q: Point out slums in Peshawar. What steps would you recommend to improve the livelihood of people live in these slum?
----- pay careful attention to the content.

Slums in Peshawar:

- 1) Granj
- 2) Faqeerabad
- 3) Near Ringroad

Granj:

This area is located in Peshawar. The area is densely populated. It is having narrow streets and too difficult to pass the car through it. The construction done in the area is not according to the planning. The area is so over crowded. The area is having poor sewerage system. There is no health facility in the

2

area. The garbage laying every where. There is risk of electric shocks because of poor electric line system.

Steps to improve:

The area should provide best sewerage system. The garbage should pick on time so that the area may remain clean. Government should provide water on time so the people may not face the problem of water. The government should provide traffic police on traffic signals and then the people will not face traffic problem and ^{over}crowdness problem. Government should repair the roads and streets. Government should construct the park in the area for the people for daily walk and outing. Government should provide hospital for best health facility. Government should provide bus stand in the area. so the people should not face any problem of travelling. Government should provide grocery store in which every food items will be available. Government should provide banking and best utility facility to the people.

Q2: Explain the structure & pattern of Islamabad Master plan. Also mention what could have been done during stage to make this master plan better or mention what was done wrong while planning Islamabad by criticizing it?

Structure and Pattern:

Islamabad is a well organized and most developed city divided into different sectors and zones. The main area of Islamabad is metropolitan area and is formed by two highway Islamabad highway and murree highway. The city is divided into eight zones including administrative, diplomatic enclave, residential areas, educational sectors, commercial areas, and rural and green areas. The road network is dependent upon the natural axis of the city. Its structure is built on a grid iron pattern. For inter city movement, four highway serve as utility and communication corridors, namely Islamabad Kashmir, Soan & Capital highways. GI Road was accommodated in the plan. Markets or commercial centers were planned in each sector whereas in each sub-sector small shopping centres for meeting the daily needs of residents

with in a short radius was constructed. The government approved five sub-divisions zone IV, private land owners in zone IV were allowed residential & commercial construction like other areas & zones on Islamabad.

What could have been done during the planning stage :-

- ★ The city has not specific zone of sports. There are no any sports stadiums if there would be sports stadiums for eg: Cricket stadium then the planning would be perfect.
- ★ Through out the city there are no car parking for eg: with shopping malls, with public parks etc the people park the car where they found the place and it results the traffic problems.
- ★ There is no specific educational zone all universities are in different areas every university is so far from other universities.

What was done wrong while planning :-

- ★ At the time of planing they did not care about the land area they used wast area at the time of planing the city.
- ★ They did not care about the budget at the time of planing. The city faces much economic problems.
- ★ The completion time was not estimated and it many years to complete. Some of projects are still pending.
- ★ The city also faces administrive problems.

Q3

Peshawar is a multiple nucle model of city.

Peshawar is located in Peshawar K.P.K. The people of Peshawar are Pakhtuns. It climate is warm. The city is densley populated. The city is over crowed.
