- Patients reduce doctors controls.

Q No-2

## ANSWER

The mutuality is one of the most effective type of doctor-patient relationship. Because in this type some of the important works are

- Mutual relationship between doctor and patient.
- Meeting between understanding parties.
- Both are equal partners.
- Exchange of ideas.

Report says the ability to empathize is the most important quality in a healthy doctor-patient partnership. This is the most effective way to gain the trust of a patient and to achieve a truly open, mutually respectful relationship.

Doctors must always take time to understand not just the physical ailment the

Patient is suffering from,  
But their emotional state.

Dr Peter Lepor medical director  
of Memorial Care Centre of  
Obesity in Junction Valley,  
California he says the  
most important thing between  
doctor-patient is trust.

Q No. 3

## TYPES OF INTERVIEW

There are five types of interview.

### (i) PANEL INTERVIEW:-

In a panel interview, typically three to six numbers having different roles in the organization ask condition candidates question to assesses their knowledge ability to make decisions etc.

Eg.

Armed forces recruitment  
admission interview, job  
interview.

### (ii) ONE TO ONE INTERVIEW

In one to one interview, one person take interview, it is an interview interaction between interviewee and interviewer. E.g. job interview, viva, counseling session etc.

### (iii) VIDEO CONFERENCE INTERVIEW

Video conference interview are becoming more common, they expand

The more scope of searching for qualified candidates with less cost and time involvement.

E.g.

National and Multinationals job Recruitments.

(iv)

### PROFESSIONAL / DEMO INTERVIEW

The type of interview requires presentation of already selected topic by interviewer in front of randomly assembled panel.

E.g.

class assignment, Teacher requirements marketing etc.

(v)

### CASE INTERVIEW :-

In a case a interview condition is given a problem he or she would work it out on that the spot and would manage the given problem.

E.g.

Doctor, physiotherapist etc.

The more scope of searching for qualified candidates with less cost and time involvement.

Q No 4.

## REASSURANCE TO A FEARED PATIENT

Some patients are very afraid from anesthesia and from any other process of dentists. We should keep care and provide a good reassurance to his patients.

First of all we should keep ~~be~~ busy to the patients, we start movies or game to the patients due to this purpose the patient feared will be decreased.

OR WE FOLLOW STEPS BY STEPS  
INSTRUCTIONS.

Gently Breathe In- hold- and let Go.  
Gently pull your toes up toward your knees.

Just a little- hold- Briefly and let Go  
press your heels into the floor- hold  
and let Go

Put your knees together- hold  
Briefly Now.

let them drift apart a little.  
Squeeze your buttocks together hold  
Now let Go.

~~We used~~

We used different methods  
for patients the most common  
thing we given courage to  
his patient, this his the  
main things for keeping  
bearing which is used  
most dentists.

---

End of the  
paper.
