Question No. 1

How will you take blood patients?

Answer:-

The blood pressure of a patient is wrapped around the cuff upper portion of the arm and pumped with air until flow in the artery is blocked. As the pressure is of cuff is relaxed, 2 numbers are recorded. The first noted number is called the systolic blood pressure and the second one is called diastolic blood pressure.

Question No. (21).

What is a neuromuscular junction. Draw and label diagram.

Answer:-

The neuromuscular junction (NMJ) is a synaptic connection between the terminal end of a motor nerve and a muscle (skeletal muscle fibres). It is the site for the transmission of potential from nerve to the muscle.

INFINITY
