

SPELLING

NAME ASIM HASSAN

ROLL NO 16938

Spelling is important for exactly the same reason that grammar and punctuation are important: poor spelling makes for poor communication.

Academic writing requires a high degree of accuracy, and this is reflected in the quality of the writing. Sloppy spelling gives the impression that you don't care about the assignment...

English spelling is notoriously whimsical and inconsistent. Spelling conventions have grown up over centuries as the result of the mixing of different languages (French, German, Latin, etc.) as well as different social fashions (for example, many of the differences between spelling in British English and American English can be traced to different social fashion).

Rule One: use a dictionary or the spell-check built into most Word Processors.

Rule Two: use a dictionary or the spell-check built into most Word Processors.

Rule Three...

2.1 Words to watch

To and too To is used with the infinitive (to watch, to run, etc.) or with an indirect object (I gave the book to the student) or as a preposition (The Manager ran to the Fire Exit)

Too is an adverb – it adds information to a verb: that athlete was too slow to win the race. In addition, it can be used in the sense of also: The teacher, too, was puzzled by this suggestion.

Their, there and

they're

Their is a possessive form (something belonging to them)

There is an adverb, indicating location (over there)

They're is a contraction of they are

Its and it's Its is a contraction of it is

Its is a possessive pronoun (it belongs to it: its properties, etc.)

Accept and except Accept is a verb, meaning to receive something (I accept that gift, they

accepted this idea)

Except can be a verb, except it is often used as a preposition meaning but

(I would accept that idea, except it is wrong.)

Affect and effect Affect is a verb meaning to influence (Holiday arrangements have been badly affected by the weather conditions)

Effect is the outcome of a chain of events (cause and effect)

Separate not separte occasional not ocassional incidentally not incidently

Desperate not desparate definitely not definitaly dependence not dependance

2.2 Some Odd Spelling Rules

What to do with e

There are exceptions to all the rules about e – including the classic i before e, except after c (e.g. weird, science, etc.). There are a few useful general tips, however:

Dropping the e

Words ending in e often lose the e when a suffix (the ending which is added to a word) begins with a vowel or when a y is added. For example:

desire + able = desirable

criticise + ing = criticising

advise + ory = advisory

educate + ion = education

arrive + al = arrival

close + ure = closure

noise + y = noisy

Keeping the e

Inevitably, there are exceptions to this general rule, and the e is kept. For

example:

like + able = likeable

stripe + y = stripey

The e is also kept when the suffix begins with a consonant, as in -ness, -ly, -

ment, -ful, -less etc. For example:

sincere + ly = sincerely

late + ly = lately

polite + ness = politeness

place + ment = placement

complete + ly = completely

blame + less = blameless

But (of course!), there are also exceptions to this rule. In some cases, the e

is dropped before the consonantal suffix. For example:

argue + ment = argument

wise + dom = wisdom

true + th = truth

true + ly = truly

nine + th = ninth

. PUNCTUATION

Punctuation is simply about a series of conventions that make it easier for readers to follow your train of thought. A complete sentence (one thought or

idea) is indicated by a full stop (.). A pause in the flow of thought, for example, to allow additional information, is indicated by a comma (,). A semicolon (;) is used to indicate a fuller pause than a comma, but not the final end of the sentence. A colon (:) is used to indicate the beginning of a list.

Full Stops

Full stops are used to divide text and create boundaries by marking the end of a sentence.

Make sure that your full stops look like full stops and that they are distinct from commas.

Make sure that the letter following a full stop is always a capital letter and looks like one.

Remember, feedback from your lecturers that points out that there are too many commas in your writing may well mean that your commas are doing the wrong job. After you have completed one sequence of thought, indicate this with a full stop. Then move on to the next one.

Commas

Commas are used to divide up groups of words within a sentence. They are extremely important and help to keep units of writing together. This helps to clarify understanding and avoids frustrating the reader.

The main function of the comma is to:

Break up parts of longer sentences - for example:

After the main points had been presented, the students were asked for their comments.

(N.B. The comma in this example neatly divides the meaning into two parts. If there were no comma, the reader would read, presented the students⁶. As a word group, and this would not make sense without re-reading for

clarification.)

There would, however, be no comma in the following sentence:

They decided to go to the library and find further information about the topic of the essay.

In this case, a pair of ideas is linked by the word and, no pausing occurs in speech, and no punctuation (i.e. comma) is needed to clarify the meaning.

Present items in a list. For example:

I would like to watch the video, take notes and then be ready to ask questions.

Divide words which refer to the subject of a sentence. For example:

The President of the Society, Julie Jones, received a standing ovation after her speech.

Punctuate certain relative clauses (i.e. parts of a sentence beginning with who, which, or whose). For example:

The College, which is situated in the centre of Canterbury, has an excellent academic reputation.

In this example, the part of the sentence between the commas is designed to add extra information to the statement about the college.

A comma is not always used with words like who or which. Consider the following example:

I like lecturers who give high grades for my work.

In this example the meaning is derived from linking up the lecturers and who give high grades..., not from separating out these two parts of the sentence.

Try reading this sentence with a comma (pause) before the word who. Does the sentence make sense with this comma?

Some words or phrases (in traditional grammar, at least!) expect a comma

after they have been used: e.g. However, nevertheless, for example, etc..

3.3 Colons and Semi-Colons

Colons should be used only:

To introduce a list. For example:

An essay usually includes the following components: an introduction, a main body of text and a conclusion.

To show a link between the units of meaning, like a hinge. For example:

The results of the referendum were very clear: there was a need for a change in policy.

Semi-colons are extremely useful in long sentences, but be careful not to over-use them. They are typically used as follows:

In the library there were several students reading journal articles; a couple of lecturers checking the stock, and a librarian returning books to the shelves.

To provide a break in a sentence, while showing the relationship between the two parts. For example:

Night was falling; he knew all was lost.

To express an idea which is too short to merit a new sentence. For example:

Wherever possible, students should try to organise their academic work by using planning tools; these can help to clarify ideas.

In some cases semi-colons are followed by linking words, as in:
