Definition of Dictionary

A dictionary is a book that not only lists and records the words of a language but it also tells you how speakers of the language spell, pronounce, define, explain and use the words of their language.

A dictionary is a reference book and provides useful information. It is useful only if you learn how to use it correctly and efficiently

What is VOCABULARY?

- Vocabulary basically refer towards “ list of words” or “the stock of words” used by a person.

- Our reading and writing vocabulary is larger than our spoken vocabulary because we have time to make an effort to recall words when we read or write; speech flows faster and there is less time to recall words. So, our reading vocabulary (passive one) is the largest and our spoken vocabulary (active one) is the smallest; we use all the words we know when we are reading and use the fewest of the words we know when we are speaking.

Q2: CREAT A WEB PAGE WHICE SHOETHE FOLLOWING OUTPUT:?
