Q1: Using the following business rules create your own ERD.

Following requirements for a simple database for the National Hockey League (NHL):

- the NHL has many teams,
- these teams only belong to NHL
- each team has a name, a city, a coach, a captain, and a set of players,
- each player belongs to only one team,

• each player has a name, a position (such as left wing or goalie), a skill level, and a set of

• injury records NHL has an official website.

• The website has a unique URL and title.

Q2: Now convert the ERD made in Q1 to Rational Model.

	Captain	City	Team		T Name	Coach	City	Player Name	ID	Skills
	Umer	Peshawar	Lions		Loins	Ali	Peshawar	Aizaz	A2	Tackle
Mohsin	Multan T	Tigers	;	Tigers	Fahad	Multan	Haris	D3	Run fast	
				V		<u>.</u>	↓	Q		
				T Nan	ne	City	Player nam	e		
				Loins	\$	Peshawar	Aizaz			
				Tiger	s	Mulltan	Haris
