INDIVIDUAL EXERCISE

Changing Others' Perceptions of You

How do other people perceive you? Identify one element of how others perceive you that you are interested in changing. It could be a positive perception (maybe they think you are more helpful than you really are) or a negative perception (maybe they think you don't take your studies seriously).

- 1. What are the reasons why they formed this perception? Think about the underlying reasons.*
- 2. What have you done to contribute to the development of this perception?*
- 3. Do you think there are perceptual errors that contribute to this perception? Are they stereotyping? Are they engaging in selective perception?*
- 4. Are you sure that your perception is the accurate one? What information do you have that makes your perceptions more valid than theirs?*

5. Create an action plan about how you can change this perception.

(ANSWER)

As individuals realize that I am an understudy of computer science yet when I help those individuals who are unskilled they think I am the unassuming individual among instructed individuals yet at whatever point understudies sees me they think I am a moron individual and burning through my time while helping individuals. As common I apply my insight from various points on various things and see diverse issue from various points that is individuals love me for the adjustment in their work. As I said that individuals are with my assistance since I improve thoughts yet when a computer science understudy have a place such a clan where no power and web exist obviously they will feel that I am burning through my time. Our investigation is an electronic examination if it's tied in with programing or books, might be

instructional exercises. How you can make due in such a climate. I can't make them wrong on the grounds that a clinical understudy don't the sentiments of a computer science understudy when there is no web and a power.

Ans 1: As I said that an understudy of computer science consistently around you without a book, it would seem that a joke to clinical understudy and even ignorant individuals as well. The reasons are

- A computer science understudy never have a book.
- Can't survive without an internet.
- No power no investigation.
- Helping helpless children and others in neighborhood.

These days individuals imagine that if an understudy help in liberated from others he isn't shrewd or suppose he is a moronic kid.

Ans 2: For the positive perception I have fix two days to work and help the individuals who are in my area and for the pessimistic view of individuals, I made a DC framework for my PC and purchased a switch for information sim. Notwithstanding, it's as yet intense here yet I will proceed with my excursion.

Ans 3: obviously there are perceptual mistakes in contrary yet I am likewise harming my way of life and my future by aiding a lot of those individuals who are truly mean. May be they are not decent they are simply attempting to utilize me.

Ans 4: Yes, I am sure that my perception is exact one in light of the fact that nobody realize that how an individual is experiencing his life. Nobody should pass judgment on an individual through their actual appearance. As I notice over that in my encompassing there are no understudy of computer science. Everybody do their examination from books and when I open my portable in any event, for perusing a book or a slide. They begin talking against me even to my family.

Ans 5: individual can change an impression of other even by arranging in the event that they don't hear you out. They think I rationalize. So what I plan is that I will keep these folks close to me one day and I will turn on instructional exercise of coding for them and advise them to remember it and compose this code on the off chance that they do so I will instruct them to roll out an improvement in it. Also, they will what are the requirements of computer science understudy. I trust my arrangement works.
