❖ Argumentative::

<... 16 years of education should be free for everyone in Pakistan.. >

Do u know what is education..? Actually education means change in behavior, but in reality education is the life itself. Education is the thing which distinguish the difference between human and animals. Education teach us how to spend the life. It also show the ways of Life.

As we know that our holy Prophet Hazrat Muhammad (PBUH) say that: Getting education is the duty of every Muslim whether it is male or female. So that mean it is the right of everyone to get education. As it is mentioned in the above topic that 16 years of education should be free for everyone in Pakistan. I totally agree with that because education is everyone's right and also it should be free. Because Pakistan is the country whose government is well stablished but its people are mostly poor, which is a great issue in Pakistan. To solve this issue the main thing is to educate people. The mostly people of Pakistan belong to a poor community and they are unable to get their food, in such condition how they will educate their family. So its our government duty to educate people and give them free education because educating one person mean you educate the whole family. And also there are many people who are really intelligent but they are poor and can't get proper education. As there are many countries where education is free and now they are in a good condition on the world map. If you want Pakistan to be in a good condition then give people free education. Due to good education people will be able to spend their life in a good way, and also it will help them a lot in their aims.16 years of free education means is well enough for everyone in Pakistan because this makes them to stand in their own feet.

I also agree with this that 16 years of education should be free for everyone in Pakistan because the reason behind this is that now a day Pakistan is in a very bad condition because of the lack of education. It is also because educating people means educating the whole country. And also education is the only thing through which you can simply distinguish between right and wrong. Good education is also a source of respect and income. The more you educate the people the higher will the opportunity for country to stable and country economy will be good. If the government free the education the people will get more interest in it and everyone will get that beautiful opportunity and which will help them a lot for their bright future. 16 years of free education is more enough for the people especially in the country like Pakistan.

In many opinion it's a very great idea to giving a 16 years of free education because it will helps a lot in the development of Pakistan. Because Pakistan is the country which doesn't give much importance to education instead they give importance to military defenses. Pakistan spend an average of only 6 to 9 percent of its budget on education which is not enough for the

development of Pakistan and average of upto 70 percent on military. Its good to spend most of the budget on military but it also important to focus on the education and give mostly free education to people. Pakistan has many talent and only thing is to only focus on it. Simply education is everyone's right and especially free education. For better future everything is important but the more important things is for the better future is education because education is life.

- ❖ Descriptive Essay ::
- ❖ { The way I spend my lock down during Covid-19 }

Covid-19 is the latest bacterial disease. It is caused by a bacteria which is in a crown shape. This disease is present in most of the countries. It is a very dangerous disease because there is no proper treatment for this disease. The only thing to protect ourselves from this disease is to stay home. So that's why every country made a policy against Covid-19 to protect their people from death. The policy is known as lock down. In this policy government will force you to stay home.

Everyone spend their lock down in different ways but the way I spend my lock down during Covid-19 was very simple. We had a total of 10 days of lock down. First day of lock down we spend in a very simple ways because we did nothing more just spend our first day of lock down in sleep and in using mobile. On the other days we used to play ludo and spend most of our time in playing it and it was continued for the next days. We would also used to flew the kites in afternoon time because you just have to stay home. During these days I would used to spend most time in taking rest and in sleeping. On the seventh day of lock down I felt ill and I was in a very bad condition. I was afraid about one thing that if I was effected by Covid-19. I was really scared because I had a high fever which was 101 which is symptom of Covid-19 so that's why I was really afraid. I was also in a great pain. I was also afraid of going to doctor because you knew about the present situation of Pakistan. But I have check myself to the doctor so I went to doctor and told all about my present condition. The doctor examined me and he also told me fever and body pain is not actually because of Covid-19, instead it is because of the throat infection. So he just refer me some of the antibiotics and some pain killer. For the rest of the day I took total rest until the lock down ends.

Everyone spend lock down in their own way but the way I spend was really hard and bad because I got sick and did nothing more just rest. In my opinion Covid-19 is not a joke it is a very dangerous disease and we should safe our self from such disease which doesn't have any treatment. The only way to protect ourselves from this is to stay home and have less interaction and also used to wash and sanitized our hands. We should keep distance between each other and also not shake hands. So please stay home and be safe..

The END.
