Techniques of Readings Skills

Scanning: Reading something rapidly for a specific information.

Concentrate on the key word and need the exact content of the page.

Skimming: Reading a text quickly to gain a general impression of whether the text is of any use. The purpose is to get an overview of the text to check its relevance.

word for word: when
lexical materials is not
readily understood and it
requires a slow, careful
and analytical reading.

Skimming:

Reading

Strategy:

You read fast, often skipping words, sentence, sometimes even paragraphs. That are not important and try and get an overall understanding of the text.

purpose of Reading

Reading for an overall understanding of a text.

Example:

Reading a story, a newspaper, a film review, a description, etc.

Scanning:Reading Strategy:

You do not read the contents from cover to cover. Instead, you go to the specific page on which there is information quickly run through and locate the specific item (s) of information.

Purpose of Reading:

Reading to get a few specific items of information.

Example: Look up some specific information in a dictionary, encyclopedia, a product manual, brochure or other reference resources.

! Sorry mam i have no laptop.
please accept my assignment.
