⇒ Over denture ⇒

⇒ Extraction of teeth followed by continuous ridge resorption and poor denture foundation loss of periodontal receptors responsible for proper masticatory function and accurate jaw movements retention of few remaining teeth to support denture will present periodontal receptors.

⇒ The over denture is an removable partial denture or complete denture that covers and rests on one or more remaining natural teeth, the roots of natural teeth and or dental implants.

⇒ Advantages ⇒
 ⇒ ⇒ ⇒ ⇒ =

↳ Helps to reduce

shrinking of surrounding bone.

⇒ Reduce pressure to portions

of the alveolar ridge

⇒ positive psychological advantages of still having teeth.

⇒ Support stability and retention.

⇒ preservation of alveolar bone.

⇒ Feel more like having teeth.

⇒ more retentive in many cases.

⇒ Patient acceptance.

* ⇒ Dis advantages ⇒

↳ It may cause attrition of teeth.

→ Meticulous oral hygiene is required.

⇒ Bony undercuts.

⇒ Required special materials and attach material.

→ More bulky than fixed or movable partial denture.

⇒ Perio dental breakdown of the abutment teeth.

⇒ Caries susceptibility.

⇒ More expensive.
