Impacts of highway (roads) & building on agriculture land:-

Impact of highway & building on agriculture is that highway is crossing the agriculture land the crops of these type of land is not like other best agriculture land.

Like these building which are near the agriculture land the shadow of building is on agriculture land and the crops of these type of land is not like other agriculture land.

In our village the roads and building impact the agriculture land which are near the agriculture land crops of that type wheat or other crops less or not like other.
