## Impacts of highways and buildings on agricultural land of our village and city:

The highways and buildings has effected our agricultural lands very badly.

.due to highways and buildings many lands that were used for cultivation of crops in our village are now no where to be seen.

.due to highways many of the trees are cut downed in fields which has adversely effected our agricultural production.

.buildings has stopped the sufficient light of sun to reach at crops and trees which has effected the quality and quality of our agricultural goods .

.the polluted and used water from buildings containing different harmful chemicals has been flowing to our fields which has made the land poisoness and thus its production is reduced.
