## Subject: construction management

Name: Asfandyar khan
Roll no: 7399

## Ans(1)(a):

As we are hired in the construction phase so our WBS and activity will be in construction phase

Now we will make activity list for this

| WBS LEVELS | Activity |
| :--- | :--- |
| construction |  |
| Preparatory works | Site clearance |
|  | Site layout |
|  |  |
| Civil structure works | excavation |
| substructure | foundation |
|  | dpc |
|  | ground floor beams and columns |
| superstructure | Ground floor slab plus curing |
|  | First floor beams and columns |
|  | First floor slab |
|  | Ground floor brick work |
| Preliminary | First floor brick work/walls |
|  | OHWT |
|  |  |
|  |  |
|  | Rough electrical |
|  |  |
|  |  |
|  |  |
|  |  |
|  |  |
|  |  |
|  |  |
|  |  |

|  | Plumbing fixtures |
| :--- | :--- |
| Civil finishing works |  |
| Internal works | Door/windows frames |
|  | flooring |
|  | paint |
| External works | Door/window frames |
|  | flooring |
|  | paint |
|  |  |

## Ans(1)(b)

## Now we will add timeline to above activity table

| WBS LEVELS | Activity | time |
| :--- | :--- | :--- |
| construction |  |  |
| Preparatory works | Site clearance |  |
|  | Site layout | 7 days |
|  | Civil structure works | 6 days |
| substructure | excavation |  |
|  |  | 13 days |

|  | foundation | 13 days |
| :---: | :---: | :---: |
|  | dpc | 4 |
| superstructure |  |  |
|  | ground floor beams and columns | 15 |
|  | Ground floor slab plus curing | 20 |
|  | First floor beams and columns | 15 |
|  | First floor slab | 18 |
|  | Ground floor brick work | 8 |
|  | First floor brick work/walls | 8 |
|  | OHWT | 21 |
| Electrical and plumbing |  |  |
| Preliminary |  |  |
|  | Rough electrical | 11 |
|  | Rough plumbing | 11 |
| finishing |  |  |
|  | Electrical finishing | 12 |
|  | Plumbing fixtures | 12 |
| Civil finishing works |  |  |
| Internal works |  |  |
|  | Door/windows frames/finishing | 13 |
|  | flooring | 27 |
|  | paint | 20 |
| External works |  |  |
|  | Door/window frames | 7 |

|  | flooring | 10 |
| :--- | :--- | :--- |
|  | paint | 8 |
|  |  |  |

Ans(1)(c)
CRITICAL Path: so, the combination of successive activities that can not be delayed and have zero float are called critical path

So, from the above activity list we will pick the activities which lie on the critical path

- Excavation
- Foundation
- Ground floor beams and columns
- Ground floor slab
- First floor beams and columns
- Electrical fittings
- Plumbing fixtures

## Ans(1)(d):

To sum up all the activities the time taken by the project is 279 working days $=46.5$ weeks

But there can be float or delay of some activities due to weather or some national holidays, so we increase the days to 310 working days= 51.6 (excluding Friday).

## Ans(1)(e):

SLACK TIME: this is the amount of time in which an activity can be delayed such that the whole project isn't Delayed, so from above activity list we will identify activities with slack time.

- First floor slab up to 3 to 4 days due to shuttering problems/rain fall
- Exterior paint delays up to 3 to 4 days due to rain fall
- Exterior doors like main gate fixing delay up to 2 to 3 days
