Case study 1:

Question 01:

Should Donald take Bernadette's advice and turn a blind eye to the situation, or should he intervene?

Answer:

In my point of view Bernadette has to intervene because the performance of Jimbo was degrading which directly means the Bernadette failure. If Bernadette doesn't intervene then the environment of the workplace would go downward. If there is any romantic relationship between employees, they should not express it in the workplace. If Bernadette turns a blind eye on the situation then tomorrow someone else from the employees will make the same relationship with another employee and then the situation would be difficult to control once this culture generates in the workplace.

Case study 02

Question 01:

What should Malou do?

Answer:

In this situation Malou should take their boss with confidence which would be superior mike mariona and tell them the whole story. If the boss also allows her to do the same as directed by the mike mariona then Malou should recruit the girl. It is because the Malou has to do whatever she is directed by their boss. Malou is just an employee of the organization while the organization belongs to their boss. If the boss doesn't have any problem with this recruitment then Malou shouldn't have also.

Case study 04

Question:

Has Jason done anything wrong?

Answer:

I think Jason did it wrong that he edits his attendance for that day. It is because he used his authority in wrong way. Even if he was late due to his boss still it is ethically wrong to edit his attendance. It would be better if he asked his boos whether to edit his attendance or not.
