

SUMMER EXAMINATION 2020

NAME M ZEESHAN

ID# 14882

SECTION# B

DEPARTEMENT BS (SE)

INSTRUCTOR

SIR DR ATIF ISHTIAQ

QUESTION#1

Create a presentation in Microsoft Power Point Choose your own topic?

ANSWER

(1)

IQRA NATIONAL UNIVERSITY PESHAWAR

NAME	M ZEESHAN
LAB	ICT
SECTION#	B

ID# 14882
BS SOFTWARE ENGINEERING

INSTRUCTOR
SIR DR ATIF ISHTIAQ

The image shows a presentation slide for IQRA National University Peshawar. The slide has a dark teal background. At the top left, the university name is written in a white box. Below this, student information is listed in white text: Name (M Zeeshan), Lab (ICT), and Section (B). The student ID is 14882, and the program is BS Software Engineering. The instructor's name, Sir Dr. Atif Ishtiaq, is displayed at the bottom. On the right side, there is a large, circular logo of the university. The logo features an open book in the center with the letters 'INU' below it, all enclosed in a decorative wreath. The text 'IQRA NATIONAL UNIVERSITY' is at the top of the wreath, and 'DEFINING POSSIBILITIES, CREATING OPPORTUNITIES' is at the bottom. A red square is visible in the top right corner of the slide.

TODAY MY TOPIC IS ABOUT

ARTIFICIAL INTELLIGENCE

NOTES COMMENTS

What is Artificial intelligence

- ▶ Artificial intelligence (AI), sometimes called machine intelligence, is intelligence, demonstrated by machines, unlike the natural intelligence displayed by humans and animals. Leading AI textbooks define the field as the study of "intelligent agents": any device that perceives its environment and takes actions that maximize its chance of successfully achieving its goals.^[3] Colloquially, the term "artificial intelligence" is often used to describe machines (or computers) that mimic "cognitive" functions that humans associate with the human mind, such as "learning" and "problem solving"

Autonomous weapons are artificial intelligence systems that are programmed to kill. In the hands of the wrong person, these weapons could easily cause mass casualties. Moreover, an AI arms race could inadvertently lead to an AI war that also results in mass casualties. To avoid being thwarted by the enemy, these weapons would be designed to be extremely difficult to simply "turn off," so

humans could plausibly lose control of such a situation. This risk is one that's present even with narrow AI, but grows as levels of AI intelligence and autonomy increase.

This can happen whenever we fail to fully align the AI's goals with ours, which is strikingly difficult. If you ask an obedient intelligent car to take you to the airport as fast as possible, it might get you there chased by helicopters and covered in vomit, doing not what you wanted but literally what you asked for.

Applications of Artificial Intelligence

The applications for artificial intelligence are endless. The technology can be applied to many different sectors and industries. AI is being tested and used in the healthcare industry for dosing drugs and different treatment in patients, and for surgical procedures in the operating room.

The applications for artificial intelligence are endless. The technology can be applied to many different sectors and industries. AI is being tested and used in the healthcare industry for dosing drugs and different treatment in patients, and for surgical procedures in the operating room.

Categorization of Artificial Intelligence

- ▶ Weak artificial intelligence embodies a system designed to carry out one particular job. Weak AI systems include video games such as the chess example from above and personal assistants such as Amazon's Alexa and Apple's Siri. You ask the assistant a question, it answers it for you.
- ▶ Strong artificial intelligence systems are systems that carry on the tasks considered to be human-like. These tend to be more complex and complicated systems. They are programmed to handle situations in which they may be required to problem solve without having a person intervene. These kinds of systems can be found in applications like self-driving cars or in hospital operating rooms.

QUESTION#2

Create a web page which show the following output:

- Your own CV which include your all data and picture
- Create a registration Table which include your name

Your father name degree registration number and address

ANSWER

(1)
