Salam mam this is nimra bibi
student of 2nd semester microbiology
department. Mam I want to say
that I don't have internet
laptop facility so that's why I
wrote my assignment on paper.
So it request please accept my
assignment and I will arrange
laptop for my self as soon as
possible. So once again I want to
say please accept my assignment
I will be thank full to you

Name :

Nimra Bibi

Subject :

English

ESSAY:

"Smoking in public places has to be banned"

The number of people who smoke have increased over the year. All of us knows about smoking that howa risky it is and how badly it affects once health. but still people choose to smoke however the most bad thing about smoking is that it is not only bad for smoker it also affects people who are present around them So government has to take some serious steps against smoking. Smoking should be banned in public places. Smoking can cause very serious health issues like lungs cancer, heart problems, asthma and many more dangerous diseases. And people who smoke in public portray a bad example. Children are easily influenced in their growing stages. They dont know difference between wrong

and right. So this brings very bad impact on their mind and teenagers who see people smoke in public take it a precedent to start smoking as well. They thought by doing so they will seem to be cool. So in short smoking has very bad impact on our society. So in short smoking should be stopped and banned in public areas and by doing so it will promote a healthy lifestyle for every one. Because just by being in public places where other people smoke they are suspected to breathe in toxic fumes. Consequently the health of innocent people is in danger. By disallowing people to smoke in public places will cause smoker to smoke less because by this smoking period of smoker should be decreased. And as long as the person will be out of home he will be enable to smoke and

So it could also help them break their addiction to cigarettes. In the long run it could help them quit, and will help them to develop a healthier life style. So banning smoking has very great and positive effect on our society.

Essay:-

"Parents are first and important teachers"

Parents are our very first teachers. They teach us to speak, walk, ride a bike, behave ourselves etc. They with great patience pass down the essential knowledge that we need in order to join "the real world". Children often copy their parents. They are so sure that what ever their parents do that is right. And they follow their parents step by step. And they wish to be like parents. And parents are the best teacher of our lives because they never wish bad for their children. They spend their money on these children. They provide them better life. And they do so without any greed of return. And parents do not teach their children bad things. In short parents are the best teachers because

They give their knowledge that cannot be taken from books when it need to be known by children. The most important lesson that we learn is that no one is like parents and no one means no one. No body should take place of them. And many lessons I learned from them.

Admit mistakes:-

It would be foolish for me to claim my parents have been perfect. They aren't. But when they make a mistake they humbly admit it. And work to fix it.

Good Friends:-

Healthy friends cultivate healthy friendships. And my parents taught and modelled what it means to be a good friend to others.
