Effects of urbanisation on peshawar city land & envirement

On land:

.due to urbanisation the land which was once used for agriculture purposes is now under huge buildings.

.urbanisation of the city has made the use of plastic to a great extent and with out proper recycling it is making the land polluted.

On environment:

.urbanisation has effected the the environment of our city very negatively.

.the use of different gases and chemicals has polluted the air.

.trees has been cut downed which is the main reason for global warming.

.polluted and used water has been added to fresh water which is a big threat to every life.

Development of our city:

Development is important in todays race of life but there is a proper way for every thing the development ways of our country and city are destroying our nature and in my opinion it has to be stopped and proper measure should be taken.
