Q no. 5 Report writing included in assignment

Population in pakistan

Nation in South asia. As you know that population brings lots of problems to the society. Population brings poverty to the nation. Population can down your nation. Population brings criminal to the society. Brings rape to the society we have a clear example of india we have also the example of some recently cases which haven't done before. We have to have work on population try to aware our people send them a kind of letters posters everything through which they can stop populated our country. Pakistan Has multicultural and Multi ethnic Pakistan society And hosts the largest refugee in the world Introduction Inoduction of population. Population means that increase number of the people in one nation. We also know that population problems will also increases The problems if we are worried to slove our problem first of all we have to control our population. Increases of population is also increases of crime of robbery of rape increasing of immorality. Increases of Enemies. And we know that in Muslims countries there is some social changes each in every race they will fight for their name that iam pashtoon he is punjabi it will arise a big crime

INTRODUCTION

And as we know that we are the fifth world most populated country. Even the develop countries cannot handled public issues their facilities because of population. If we are thinking that we will develop so we are wrong. According to latest estimate the population of pakistan is 20777457. Here is the people can speak many languages. Many tribal many languages many speakers. Tomorrow they will arise and start fight for his language because they will be a lot in numbers. They will think that we are strong. Like we have the example of tribe areas they fight even with army because they are illiterate the government cannot provide education to them

Today our report writing is about population of Pakistan. As we know that from the freedom of Pakistan to now we are very populated even comes to the 5th number in the world. In the beginning of Pakistan population very less even 4 millions now we are stand 200 million or even more than that. Our population is about 200 millions. During 1950 To 2012 Pakistan Urban population expanded over Sevenfold While total population increased forthfold. The majority of south Pakistan population lives in the Indus River Karachi is the most populated city in Pakistan. In northern from the most of people lives in arc form by the cities. And we know that the population of Pakistan is making lots of trouble for government. The government is implementing laws but no one is following the law.

Conclusion

In the conclusion we reached to this point that we have to send all refugees which effect our economy. And we have to implement a law for the controlling of population that if anyone give birth more than 2 children he will be imprisoned. So that could help to stop population in Pakistan. If we move like this so one day we will be the first populated country and the biggest criminal country we won't be able to trade the countries in my opinion we should take our first from today.
