English Assignment:

Essay about essay: → Smoking

Children are easily influenced in their growing stages. They immitate the people around them because they cannot differentiate between right and wrong. Therefore they perceive the actions they see around them as the way things should be. There is a saying that goes "monkey see monkey do," which tells us that people immitate the actions of others as they see it in their daily lives. If smoking is banned in public areas, it will promote a healthier life style for every one. People will see it as a government endorsement for a healthier life style of every body. This is because by banning smoking in public areas the government sends the message that the government cares about the health of the citizens and that the government

discourages people from smoking thus, when smoking is not allowed in public areas it reminds people that health care is very important. Second hand smoke causes sudden infant death syndrome, respiratory infections and asthma attacks in children. Besides that, second hand smoke causes heart diseases and lung cancer in smoking and non smoking adults. if the current situation continues, the health of many people will remain in danger. By prohibiting people from smoking in public the government is protecting the God given rights of its people to live a full and healthy life. Therefore, smoking should be banned in all public places.

English Assignment :

Essay about Parent :

Parents are the best teachers in the world. Although this is never ending debate topic. I agree with this statement. I strongly believe in Parents teachers. No one can find better teacher than Parents. Only they can create the foundation of children's life.

A child follows his Parents starting from his first sight in this world. Children immitate their Parents. This is the main argument behind Parents being the best teachers. Parents can teach not only discipline and moral values of life, but can also teach spiritual.

The most important lessons I learned from my Parents are hard-working and honest. For example, when my family was in Dubai, we were very poor. My father had to ride a tricycle to learn money to support for the

Family From six A.M to eight P.M.

He wanted himself and us to have a better life in the future. However, when the fall of 2010 have begun, I learn very badly, especially my math subject.

I failed the first two tests, and I did not want to drop the course. Then I have to try much harder to pull my grade up like my father tried hard to ride the tricycle, I have finally pulled it up to a C.
