

# Digital Skills

Q1

## Adobe premier Pro Interface:-

⇒ Interface is the front and main ~~work~~ panel-based workplace on the Adobe premier pro.

⇒ There are ~~four~~ panel for working on the interface.

namely → Source Monitor panel located on top left on the interface.

↳ Project panel on bottom left of the workspace.

↳ Timeline panel is present on the bottom right of the workspace.

↳ Program Monitor tap is located at the top right of the workspace.

## Q2. Reason:-

Adobe Premium Pro. is very important for the journalists working at broadcast Journalism.

Because this is a digital editing programme helps the journalists to convert their field work with hardware into complete stories. Advancement in hardware don't tell the whole story. This software tool is used to edit, process and publish videos.

### Q3 Freeze frame:-

=> Stopping a film or video at one desired frame.

=> A vivid, motionless scene or image.

=> Freeze frames are used in editing of the video on the desire place in Adobe premier pro.

### Q4 Jump frame:-

=> Jump frame is a cut between two sequential shots in a video where camera angle doesn't change or only changes slightly.

=> The frame can feel jarring or look like a mistake.

Q5

## 5 Digital skills:-

⇒ **Informative:** Journalist is supposed to be well informed person in the society. He should inform his viewers about anything happening in the society.

⇒ **Communicative:** A Journalist must build relation to the public by enhancing communication with them. If we change the circumstances and tools, the objective is same.

⇒ **SEO:** As one of the most basic digital terms, SEO (search engine optimization) has been around since the advent of online research.

⇒ **Must Aware of New Technologies:** Digital journalists work daily with new technologies so, in addition to learning how to handle them, they need to be aware of any new tool that emerge.

⇒ **Analytical:** Today, there is too much information ~~out there~~. Therefore, knowing how to interpret, manage and select the best data you receive is essential.

Q6

## Function of key frame:-

⇒ Key frame is mostly used in an animation.

⇒ used to change the properties of a video or audio effect over time.

⇒ used for <sup>avoiding</sup> jump frame by adding still images or freeze frames.

⇒ To overcome the problems with simulate camera movements.

Q7:

⇒ Using key frames is the most prominent and repeating step through out your project while editing a video in adobe premier pro. By applying key frame we can add transitions and aftereffects to the video project.

## Q8. Organizing a Project

⇒ These are the following steps for organizing a project using adobe premier pro.

- ① Create a folder on your computer for your project. Give it a name that you will remember.
- ② Inside the file you just created, create a folder for each form of media you are using (videos, Audios, Images etc).
- ③ Dump your raw media files in each folder.
- ④ Go through your media and rename the files to something distinguishable.
- ⑤ Create a folder within the media folder (video, Audio etc) and name it "Selected". Select the media files that you will or may use in your edit and move them to the "Selected" folder.
- ⑥ After making these folders and organizing your files, you are ready to start your project on Adobe Premier Pro. Open up a new project file and name it accordingly. Import all of the footage from your Selected folder into your new project app.

Q12

⇒ For Android and Pixel users, Connect the phone to your PC with a USB-C by using Android File Transfer cable for a faster import.

⇒ For iPhone users, air dropping the video files works seamlessly.

⇒ The easiest way to convert this type of footage in premier is to highlight all the footage, right click to bring up a menu of options, click "Interpret Footage" and under the "frame rate" box you'll type in 23.967fps which is equal to 24fps.

21  
We use "Crossfade" transition to fade out audio of the clip in Adobe premier pro.
