Qno: ①

Answer:-

## PATERNALISTIC

- => It refers to interactions in which decision is taken by the health care professional in order to benefit the patients.
- => Doctors acts as a father.
- => Patients accepts the paternal role of doctor and follow his guideline.

## Consumerist :-

That type of interaction in which patient is active and takes decisions, while doctor is passive.

- => Doctor follow the patient's opinions.
- => Patients reduce doctors controls.

Q. No: 2 :-

Answer :- The mutuality is one of the most effective type of doctor - patient relationship. because in this type some of the important works:-

- => mutual relationship between doctor and patient.
- => meeting between understanding parties.
- => Both are equal partners.
- => Exchange of ideas.

Lepos says the ability to empathize is the most important quality in a healthy doctor-patient partnership, this is the most effective way to gain the trust of a patient and to achieve a truly open, mutually respectful relationship. Doctor must always take time to understand not just the physical ailment the patient is suffering from, but their emotional state. Dr Peter Lepos medical director of memorial care centre of obesity in fountain valley, California. he says the most important thing between doctor-patient is trust.

Qno: 3

## Types Of Interview

There are 5 types of interview.

### ①:- Panel Interview:-

In a panel interview, typically three to six members having different roles in the organization ask candidates questions to assess their knowledge, ability to make decisions, etc.

e.g:- Armed forces Recruitment Admission Interview, Job Interview.

### ②:- One to One Interview:-

In one to one interview, one person take interview; it is an interaction between interviewer and interviewee.

e.g:- Job Interview, Counseling Session, viva etc.

### ③:- Video Conference Interview:-

Video conference interview are becoming more common, they expand the more scope of searching for qualified candidates with less cost and time involvement.

e.g:- national, and multinational's job recruitments.

### ④:- Professional / demo Interview.

The type of interview requires presentation of already selected topic by interviewer on front of randomly assembled panel.

e.g:- Class assignment, teachers requirements, marketing, etc.

interview = 20/11/17

5):- Case Interview :-

In a case a condition is given a problem he or she would work it out on the spot and would manage the given problem.

e.g. Doctors, physiotherapist etc.

## Qno:4 :- Reassurance to a Feared Patient :-

Some patients are very afraid from anesthesia and from any other process of dentists. we should keep care and provide a good reassurance to his patients.

First of all we should keep busy to the patients, we start move or game to the patients if due to this purpose the patient feared will be decreased.

Or we follow steps by steps instructions.

Gently breathe in- hold- and let go.

Gently pull your toes up toward your knees- just a little- hold- briefly and let go

press your heels into the floor- hold- and let go

pull your knees together- hold briefly, now left them drift apart a little.

squeeze your buttocks together hold now let go.

we used different methods for patients. The most common thing we given courage to his patient, this is the main things for keeping fearing which is used most dentist.
