What is the difference between paternalist and consumerist type of Doctor-Patient Relationship?

Answer,. . PATERNALISTIC RELATION SHIP

It is completely different relationships with patients from consumerist relationships because the doctor play father like role to understand his patient. In this relationships doctor take the decision in order to benefit the patients. Patients obey the roles and guidelines of doctor with open mind condition. Doctor used to tell his patient all those guidelines which remove the pain of patients. In this relationships doctor create more stress on words without any fear in his heart. Mostly in this relationships doctor active and patient show less passive condition.

2] CONSUMERIST RELATIONSHIPS

In this type of relationships of doctor with his patient in which doctor play passive role and never make full attention to hear the words of his patient properly while patients want to create more control over doctor attitude. Patients play active roles. This relationships of doctor with patients is occurs in private clinic. In this relationships of doctor with patients, doctor want to make more money with short time that is why he checke the patients without full attention. Patients have give money to him, they want to transfer good decision without fear in his heart before doctor.

Q.,,2., Which one is most effective type/ style of doctor patient relationships, and why ? Explain in detail?

Answer..., Mutuality relationships of doctor with patient is good type of relationships because both parties are exchanged their ideas without stress like friends. In this relationships patients and doctor both have high control over decision. It is considered by many as a meeting relationships. It is effective because both parties never want to show negative feelings .Patient can freely tell their medical history to his doctor as a result doctor can make good treatment for him. In this relationships stress never take place due to out put of treatment is always positive. When doctor gain open history of his patient than he will be able to provide good way in case of him in future.

Q.,,3,, Write a detail note on types of interviews?

Answer,,. There are five type of interviews which are explained below.

1] PANEL INTERVIEW

In this type of interviews have three to six members of different departments take the interview from interviewee.They have different role in organization .Candidates are going to make assess their ideas and knowledge. For example in hospital interviews there are sitting before you different type of interviewer have relationships with different departments and ask questions according to your ability.

2] ONE TO ONE INTERVIEW

In this type of interview, only one person is going to take your interview. There are sitting only two members named interviewer and interviewee.This type of interviews are more easy for candidates. The best known example of this type of interview is class viva, job interviews,.

3] VIDEO CONFERENCE INTERVIEW

It is more common nowadays because it prevent money and time. Interviewer of company expand the scope of searching for qualified candidates with less cost and time involvement. It is taken by using internet online way.This type of interviews create easy way for candidates as well as more stress never take place over both parties. The best known examples are National and multinational jobs recruitment.

4] PRESENTATION/ DEMO INTERVIEW

This type of interviews show the talent of individuals person before assembled people. In this type of interview, interviewer selected a topic and gave it to candidates for presentation or demo.In this of interviews show the internal feelings of candidate.Questions can asked by assembled people during presentation. The best known example of this type of interview is class presentation.

5] CASE INTERVIEW

In this interview a candidate have gave a problem to solve it properly and manage it's stress during interview.By this type of way the interviewer is able to check the analytical skills and the ability to think under pressure,logical thought process,creativity,communication and quantitive analytical skills.For example you work as a doctor.Patient come to you with head injury, what type of decision you make for him.

Q,4.. Suppose you working as a dental technologist is a hospital and a patient is have oral surgery for some complications in teeth. But before surgery patient is very much fearful and anxious due to upcoming surgery. Being a dental technologist and health care professional ,how will you provide reassurance to the patient ? Explain in your own words in detail.

Answer., I will provide the following techniques to reveal patient fear.

1] INTRODUCED MYSELF

First of all I will introduce about my character in hospital. I am going to explore my own history with open mood. I will show the way where he can gain the humor. I will tell to about my own life that how I reached there.I will provide the sense of calm and active.

2] OPPORTUNITIES OF HEARING

I am going to listen about him with open mood. I never want to reject the main concept of him in any case. Most people are going to know that you are listening to their concerns. I will ask open ended questions like,,how are you feeling?,,I never make yes or no,,questions.

3] EXPLAIN THE WHAT AND WHY

I will show full permission to him for the purpose to know about what are doing with him.Mostly people are become fearful in hospital environment and they never ask questions, I Wii gave permission to ask open ended questions. I will prepare patient on what to expect with any procedure that will be done.

4] I NEVER TELL TO PATIENT TO RELAX

I never tell to patient the term of RELAX but I Will clarify the hidden problem with conversations with him.I Wii ask him what he can do to help him relax.I will show him some relaxation techniques to draw the internal feelings of him.I will check the vital signs to know blood pressure.

5] ADDITION OF HUMOR

I am going to lighten the mood and construction friendly environment with him. I will ask about the area occupation of him.I tell him that from where he belongs. I will add that he take intereste in his profession or not.

6] I PREPARE MYSELF FOR STRESSFUL SITUATION

I am going to realize the negative mood of patient with good behavior. I will identify these feelings and a couple of deep breath before speaking. If he is aggressive, I will tell him Islamic role.

7] BE EMPATHETIC

I have no right to judge how some one feel and act.I will make questions according to his level ,understand his problem the way he feeding, in order to treat him properly.
