## Economic Instability

Pakistan is experiencing the worst economic crisis and the continuing downturn has worsened in recent years. A sound economy is the backbone of the country for its growth and stability. Pakistan is one of the poorest countries in the world and a substantial number of its citizens live in poverty.

The economic crisis is due to the instability of its governing institution. Policies and priorities do not change on the basis of economic laws, but on the basis of the preference and interests of its ruling class. Even in matters such as defense, education, health, and foreign relations, the ruling class changes the policies according to its self-assumed priorities ever betraying its own declared electoral mandate.
