Q no # 02: define and Explain the major types of construction project?

Ans: there are three major types of construction project are - - - -

- ① private construction
- ② state construction
- ③ federal construction

1. private construction project:

of construction project is the first type of construction project. But simply, private

construction projects are project of every type that are owned, control or

commissioned by a private party. private parties includes individuals, homeowners

corporation, other business entities non profit associations privately founded school, hospital,

publicly treated companies etc.

any thing in other way that is not

the form government.

these sub categories would includes

- ① Residential construction
- ② commercial construction

③ Indus trial construction.

② State construction project.

Some people confused by the term of "State" when talking about state construction project because the term "State" can refer the project commissioned by a country, city, municipal government board, public or any other

State-founded Entity.

State construction project can variety forms.

the can be to pretty tradition project like the construction of a public school or government building (like a court room) the construction of bridge, sewer line, highway etc.

③ federal project.

to state project just like state project are very similar taken on a variety forms: very simple and traditional and very complex. and the stuff being constructed can be similar to the stuff constructed by state authority.

Courthouse, government buildings control projects its work is done by on a federal project.

work done through the US Army Pak Army Corps of Engineer, however on state land such as the Leves, is always a federal project because it is a federally

control.
