ABSTRACTS:- The word abstract  
abstrahere comes from the Latin  
abstrahere which means a  
condensed form of a longer  
piece of writing. These are  
two main types of abstract.

- 1) Descriptive abstract
- 2) Informative abstract

### 1) Descriptive Abstracts

Descriptive abstracts are  
generally used for humanities  
and some science papers and psychology  
essays. This type of abstract is  
usually very short (50-100 words).  
Most descriptive abstracts have  
certain key facts in common  
Title etc.

Abstract

Purpose

Particulars

Particular interest/focus of value

overview of contents (not always included)

### Informative Abstracts

informative abstracts are generally used

for science engineering or psychology reports - you must get the essence

of what your report is about usually in about 200 words. Most informative

abstracts also have key parts in common each of these parts might consist of 1-2 sentences. The part

include

background

aim or purpose of research

Method used

Results

Conclusion

Penalties will be charged for overdue books.

A Technical report (also sometimes  
 report) is a document that  
 describe the process progress or  
 result of technical or scientific  
 research. The state of a technical  
 or scientific research problem  
 it might also include recommendations  
 and conclusions of the research unlike  
 other scientific literature such as  
 scientific journals and the proceedings  
 of some academic conferences technical  
 or some reports rarely undergo  
 comprehensive independent peer review  
 before publication they may be considered  
 as grey literature where there is a  
 review process it often limited to  
 within the originating organization  
 similar that are no formal  
 publishing similar there are no
