Q.5

a - DEPTH OF RIVER

The average depth of the river is 5 feet than it is not obviously that all the people have height 5 feet easily cross it. If he did not know swimming, important fact is river is not deep uniformly it is 2 feet at some points while 7 feet on other points so therefore he will cross it.

b - STUDENTS :-

No, it does not mean every student is hopeless. There would be students whose marks are less than 30 while there can be few students whose marks might be 60 or

11)

C-

AVERAGE INCOME ::

No, it is not like that average pay does not mean everyone get paid same. The King income will be much more than servents.
