SOLUTION:-

The current urbanization of the peshawer valley is bring accelerated by three kinds of in-migrants. There are those who migrate from rural areas of KP and FATA for better economic opportunities, those that arrive for access to social services, and those forced migrated that flee militancy or political presecution. Poor air and water quality, insufficient water availability, waste-disposal problems, and high energy consumption are exacerbated by the increasing population density and demands of urban environments. Strong city planning will be essential in managing these and other difficulties as the world's urban areas swell.
