Subject: computer application

Q 1: Discuss the importance of system software and how it helps users?

Ans: System software include operating system and the associated programs which and the associated programs which enable system and computer to work. It provides the foundation for the infrastructure software that link and mange hardware, networks and software together.

How it helps users:

Software and application are developed for enhance our life. We can save money and save time.

B:Write a few advantages of open source software?

Ans:

- 1)lesser hardware cost
- 2)High-quality software
- 3)simple license management
- 4)lower software cost
- 5)integrated management

Q.2: Differentiate between optical storage and magnetically storage?

Ans: Optical storage:

Optical storage device are flat, round disk that spin around its center.the difference with magnetic storage devices LASER light is used to read and write data in disk.

Example:CD,DVD etc

Magnetic storage:

The most common types of storage device .in magnetic storage device data is stored on a magnetised medium.magnetic storage use different patterns of magnetisation to in a magnetisable medium to share data.

B) Discuss the importance of main memory?

Ans: The main memory in computer is called random access memory.it is also systems know as Ram.this is the part of computers that store operating system software applications and other information for the central processing unit (CPU) to have fast and direct access when needed to perform tasks.

Q.3:Based on the discussion related to internet and it's service.elobrate the effective use of internet in

current health emergency and how different sector of life are benefiting from it.?

Ans: Internet-based Self-Services (ISS) is a subtype of **services** driven by self-**service** technologies that provide technological interfaces to allow customers to use **services**, independently of the involvement of direct **service** employee.

The **internet** is increasingly being **used** for **healthcare** delivery. ... The development of electronic patient records and the networking of primary and secondary care have the potential to improve the quality and efficiency of health services.

Internet how different sector of life:

- Email.
- Information.
- Business: World trade has seen a big boom with the help of the internet, as it has become easier for buyers and. ...
- Social Networking.
- Shopping.
- Entertainment
