**8<sup>th</sup> Semester (AHS)**

## Q.1

**A.** This prestigious leadership position helps health care facilities run effectively, which improves community health. With a job in health care management, you could help provide health services to those who need them most.

## **B. Difference between Administration and management:**

<b>Management</b>	<b>Administration</b>
An organized way of managing people and things of a business organization is called the Management.	The process of administering an organization by a group of people is known as the Administration.
Middle and lower level	Top level
Policy Implementation	Policy formulation
It works under administration.	It has full control over the activities of the organization.
Managing work	Making best possible allocation of limited resources.

**Example of Management:** How a person handles their personal finance,

The show of concern when dealing with someone fragile, how a skillful supervisor handles a difficult situation, Decision making, Motivating, planning.

**Example of Administration:** Answering telephones, arranging for meetings and travel, and managing schedules are some common example of administrative assistant duties and responsibilities.

**C. Bio Entrepreneurship:** Bio entrepreneurship is the integration of two different disciplines, science, and business. It is the flow of innovation from academic to industry.

**Example:** MaterializeX is a biotech company, focus on making new chemicals and compounds by combining chemistry and data science.

**Q2:**

**Reasons to Study medical Ethics:** Science needs an ethical frame work to make it humane. Ethical decision should respect the values and attitudes of patients. If Patients oppose vaccinations or blood transfusions for their child , their beliefs have to be taken into account, even if you , the Doctor , will not ultimately follow their requests. Following are the reasons to study Medical Ethics!

- To help resolve disputes between family, patient, physician or other parties.
- To maintain a clear conscience.
- To not make you look uniformed.
- To maintain the respect of your patients.
- To maintain respectful relationships with other clinicians.
- To maintain some efficiency.
- To reduce burn out
- Respect of public welfare.
- Cultural factors in health Care.
- Autonomy and informed consent.

**Q3: Reasons of Organizational Structure:** The purpose of organizational structure is to depict the skeletal structure of the practice, including the functional relationships between , among, and within specific components. An organizational chart provides a point of reference and improves the flow and direction of communications. It allows people to see how they fit in the big picture, increases efficiency and maintains a balance in the practice.

### **Reasons of Organizational Structure:**

- Division of Work
- Line of authority
- Flow of Authority
- Span of Control
- Delegation and Decentralization
- Departmentalization
- Growth of both organization and employees
- Organizational Structure make it easier to add new positions in the organization
- Stream line business operations of the Organization
- It makes an organization the leader in in its competitors
