Date: _____

Q.2 What type of long memory it is?

Ans:- Explicit Memory.

-: EXPLICIT MEMORY :-

- Explicit memory involve conscious effort to recall.

⇒ • Episodic Memory:- is personal experiences life events etc.

⇒ • Semantic Memory:- involves knowledge of facts, general knowledge, academics etc

Date: _____

Explanation:-

Explicit memory also called "declarative memory" is one of the two major subdivisions of long term memory. Explicit memory requires conscious thought - such as recalling who came to dinner last night or naming animals that live in the rainforest. It's almost everyone has in mind when they think of memory, and whether their is good or bad. Explicit memory is often associative; your brain think memories together.

Q.3 :-

-: CASE PRESENTATION :-

First of all I have to communicate with the student to find out the student intellectual level after that keeping in mind decision making strategies.

I have to know the result grades of student that is it possible to take admission in medical college. If it is possible to take admission but he is confused then we will find the alternate way of admission. Because it is not important that every student must enter in medical college other profession are also having a good scope in future I guide the student that he must try to enroll his self in other colleges along with medical college to avoid wasting of time.
