

# Object Oriented Software Engineering

## Term Assignment

### Question #1:

Give an overview of System Design Activities diagrammatically.

### Answer:

## **Question #2:**

Explain any two Project Interaction Types along with examples.

**Answer: Reporting:** This type of interaction is used for reporting status information. For example, a developer reports to another developer that an API( application programmer interface) is ready.

**Communication:** This type of interaction is used for exchanging all the other types of information needed for decision or status. Examples are the exchange of requirements or design models or the creation of an argument to support a proposal. An invitation to eat lunch is also a communication.
