

Course Code: IP-231-Space Planning

Lecture No 4: Standard furniture and equipment sizes to consider ergonomics

Learning Objectives and Methods of the assignment:

Furniture, a term covering the many types of moveable objects that support human activities, are the critical everyday elements that allow us to make space suitable for living and working.

Designed directly to respond to the dimensions and proportions of the human body, furniture transforms the function, efficiency, mood, style and feel of our built environment. The following collections of furniture types provide an overview of the large range of varieties and sizes of chairs, tables, beds, and storage systems available to support your lifestyle.

We will be continuing to expand our guides over time to cover the evolving field of innovative furniture designs that enable us to live, work, and make better use of space.

Method:

Book Ref: Time-Saver standard for **Interior Design and Space Planning**
