Course title: Data Structures and Algorithms   **Assignment 2**
Instructor: Engr. Bushra Tahir   **Total Marks: 10**
Date of submission: May 24, 2019

Note: Attempt all the given tasks.

Write a C++ code to find an element x=10 in an array {2, 3, 4, 10, 40} using linear and binary search technique. Your program should give an output,

```
Element is present at index 3
```

Good Luck!
